DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group II and Species I (claims 12-23, 26, and 27) in the replies filed on October 28, 2004 and February 9, 2005 (respectively) is acknowledged.

Claims 1-11 and 29-37 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention/species, there being no allowable generic or linking claim.

Claim 12 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 24, 25, and 28, directed to a non-elected species, are no longer withdrawn from consideration since they depend from or otherwise include each of the limitations of an allowed generic claim. However, claims 29-37, directed to a non-elected species, remain withdrawn from consideration since they do not depend upon or otherwise include all the limitations of an allowed generic claim as required by 37 CFR 1.141.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claims 1-11 and 29-37.

Allowable Subject Matter

Claims 12-28 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record, either singularly or in combination, does not disclose or suggest the combination of limitations including partially etching predetermined portions of the second insulating layer using the contact pattern as a mask; forming first spacers on sidewalls of the etched portions of the second insulating layer; and simultaneously forming storage node contact holes exposing the capacitor contact regions and second spacers comprising portions of the second insulating layer on sidewalls of the bit lines beneath the first spacers by etching the second and first insulating layers using the first spacers as a mask.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US Patent 5,879,986 – This reference discloses a method of making a device with a capacitor contact extending between bit lines, having sidewall spacers on the bit lines (as shown in Figures 1A-9C).

US PG Pub 2004/0188806 – This reference, although filed after the foreign priority date of the instant application, discloses a method of making a capacitor contact configuration having first and second sidewall spacers on bit line structures and a capacitor contact extending between the bit lines (as shown in Figures 2A-2F).
